

Will it fit your tank?

Aquarium plant holder: one-page measuring checklist

Tank / model: _____ Date: _____

Mounting spot: _____ Units: cm / inches

01 Rim width and shape

Measure across the entire edge the hook must bridge, including trim. Photograph the profile; note lips, braces, slopes or curved glass.

Full rim width: _____

Profile / obstructions: _____

02 Lid clearance and movement

Measure the gap at the closed lid. Check the full opening path, hinges, light brackets and cables. Do not force the lid onto the holder.

Closed gap: _____

Opens and closes freely? Yes / No / Not checked

03 Basket, roots and cleaning access

Check the intended basket position, waterline, roots, filter intake and hardscape. Leave space to lift the basket out for maintenance.

Inside space available: _____

Lift-out path clear? Yes / No / Not checked

Listed dimensions: what they mean

Hook span: 0.4-2.4 in (1.02-6.10 cm), using the illustrated hook configurations. Vertical hook adjustment: up to 3.94 in (10.01 cm). Basket vertical depth: 4.5 in (11.43 cm). These figures do not define the full assembled clearance envelope.

Before ordering

[] Rim, lid and basket space all checked [] Uncertain dimensions confirmed with support

A measurement within the stated hook range is not a fit guarantee. Physical fit has not been tested for your tank. Do not use package dimensions as installed-holder dimensions.
